

## Eligibility

- Invitation by UPE Chapter and Department Faculty
- Upper 35% of class
- Minimum GPA of 3.0
- Complete at least 45 semester credit hours, including 15 hours in Computing or Information Disciplines

## Reasons to Accept an Invitation for Membership

- Make a difference on campus
- Develop your computing skills
- Further your interest in computers with other top computing scholars
- Fun group activities, including:

Bowling

Group dinners, including Pi(e) at some meetings!

Annual SIGCSE and UPE Conference

## Upsilon Pi Epsilon

International Honor Society for the Computing and Information Disciplines

“ The mission of Upsilon Pi Epsilon is to recognize academic excellence at both the undergraduate and graduate levels in the computing and information disciplines. ”

## Upsilon Pi Epsilon

International Honor Society for the Computing and Information Disciplines

# About Us

Upsilon Pi Epsilon (UPE) is the honor society for undergraduate and graduate students in computing sciences. The mission of this society is to recognize and promote academic excellence in these fields.

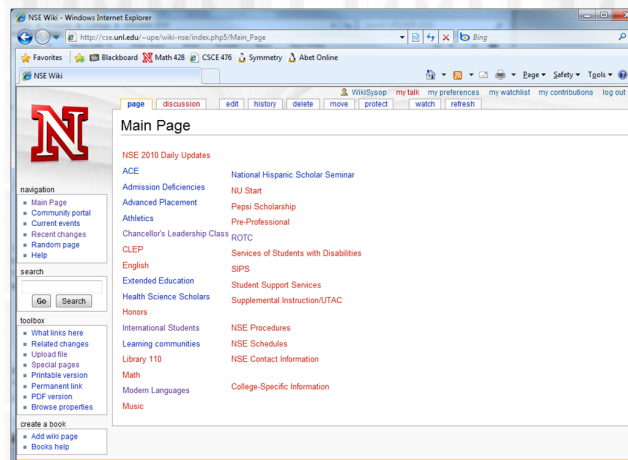

Upsilon Pi Epsilon was re-established at the University of Nebraska-Lincoln in 2008. Since its re-establishment, members have increased their knowledge and involvement in the computing sciences in several ways. One which has had a particular impact was the creation of software to benefit students and faculty at UNL during New Student Enrollment. Members have also furthered their personal knowledge and interest in the computing fields by attending and participating in annual conferences for computer educators and professionals across the country.

# Chapter Contributions

In its short period of re-establishment, Upsilon Pi Epsilon has made important and useful contributions to faculty and students at UNL.

## 2009-2010 Project—New Student Enrollment Online Application

Once a thick handbook that required tedious management and manipulation on a yearly basis, the New Student Enrollment website now enables advisors to quickly inform students of their class options. Students are now be provided with real-time updates of class availability when meeting with their advisor at NSE—a major time saver and stress-reliever for both the student and the advisor!

# Events

## SIGCSE Conference

The annual SIGCSE conference has taken us from Tennessee to Wisconsin. SIGCSE (Special Interest Group on Computer Science Education) is one of the many special interest groups of the Association for Computing Machinery (ACM). The conference is a forum for educators in the computing

fields to discuss the latest technologies and developments as they relate to computer education. It is also the location of the annual nationwide UPE conference. At these conferences, we meet with other UPE members, meet computer professionals from around the country, and learn about new software and teaching techniques that are available to improve education for students in the computing disciplines.

In addition to academic endeavors, we take time to sightsee and enjoy the cities we visit. At past conferences, we have also enjoyed delicious dinners and toured local attractions.
